## Research Experience

### Costa Lab, Icahn School of Medicine at Mount Sinai

RESEARCH ASSISTANT

- Maintained human induced-Pluripotent stem cells, mesenchymal stem cells, and cardiac stem cells in culture.
- Differentiated induced-Pluripotent stem cells into cardiomyocytes and fabricated 3-D human engineered cardiac tissues.
- Used LabView and MatLab to collect and analyze data on cardiac function.
- Designed and printed 3-D accessories using Autodesk Fusion 360 to help with the data collection process.

New York City, USA

March 2017 – Present

### Monaghan Lab, Trinity Centre for Bioengineering

RESEARCH ASSISTANT

- Stain and analyze tissues using polarized light microscopy to understand the effects of a silicone implant.
- Helped to develop a testing apparatus to determine if a scaffold propagates an electric pulse between tissue samples.

Dublin, Ireland

September 2018 – Present

### Center for Excellence in Youth Education at Mount Sinai

RESEARCH SCHOLAR

- Helped guide middle school students through dissections of the heart, eye, and kidney.
- Participated in the New York City Science and Engineering Fair with research carried out in the Costa Lab.

New York City, USA

September 2016 – June 2018

### Dean Lab, Columbia University

LAB ASSISTANT

- Exfoliated graphite to get a monolayer of graphene.
- Created a device with graphene insulated by boron nitride and used atomic force microscopy (AFM) to identify imperfections.

New York City, USA

June 2017 – December 2017

## Volunteer Experience
